Project Design Phase-I

Solution Architecture

| Date	21 October 2022
Team ID	PNT2022TMID35356
Project Name	News Tracker Application
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges

the gap between business problems and technology solutions. Its goals are to:

• Find the best tech solution to solve existing business problems.

• Describe the structure, characteristics, behavior, and other aspects of the

software to project stakeholders.

• Define features, development phases, and solution requirements to the

project.

• Provide specifications according to which the solution is defined, managed,

and delivered to the customers.
